

MULTIPLIER EVENT

LanGuide Project

Erasmus+

KA2-HE-01/19

Sveučilište u Zadru
Universitas Studiorum
Jadertina | 1396 | 2002 |

presenter: Ivo FABIJANIĆ, Ph.D., Assoc. Prof.

Zadar, May 25th 2022

Co-funded by the
Erasmus+ Programme
of the European Union

PROJECT DESCRIPTION

- The LanGuide project's main objective is to facilitate “the acquisition of LSP for different fields, difficulty levels and languages” (Kompara Lukančić and Fabijanić 2020: 42).

PROJECT DESCRIPTION

- In line with EU language policy and its efforts to promote mobility and intercultural understanding, language acquisition and multilingualism represent important elements of the EU's language policy, promoting the knowledge of 2 languages in addition to the mother tongue.

PROJECT DESCRIPTION

- In line with the linguistic background of the EU policy the project “LanGuide” is focused on internationalised education, growing use of digital learning, and supporting the creation of flexible learning pathways in line with users’ needs and objectives.

PROJECT DESCRIPTION

- The objectives of the project “LanGuide” are to build an open access students/teachers/administrative staff centered guidance tool for improving language knowledge and supporting the acquisition of language knowledge through the language guidance tool.

PROJECT DESCRIPTION

- Within the project the internationalization of the higher education programmes and the usage of up-to-date IT technologies is promoted.

PROJECT PARTNERS

- The project LanGuide joins 6 partners coming from five linguistic and geographical parts of Europe. The project partners gather 6 universities specialised in language acquisition and software development: University of Primorska in Koper (Slovenia), University of Zadar and Rijeka (Croatia), Mälardalen University (Sweden), Transilvania University of Brasov (Romania), and University of Castilla-La Mancha (Spain).

PROJECT AIMS

- Within the project activities a common methodology for the preparation of guidelines focused on language for specific purposes (LSP) was developed. The methodology was implemented in the preparation of language resources, covering 3 levels of difficulty, for preselected LSP fields for English. The developed resources were included in the language guidance tool software and mobile app.

PROJECT AIMS

- The LanGuide tool is planned for three groups of specific users - administrative staff, university teachers, and students (undergraduate and graduate), at different levels of linguistic competency (basic, intermediate, advanced).

INTELLECTUAL OUTPUTS

LanGuide will use a result-oriented methodology, namely to prepare a universal methodology that will lead to the preparation of the language guidance tool for LSP and several languages, as the main project objectives are:

- - supporting the acquisition of language knowledge through the language guidance tool;
- - the internationalization of the higher education programmes;
- - and the usage of up-to-date IT technologies.

The objectives will be achieved with the implementation of 4 different intellectual outputs including different activities

INTELLECTUAL OUTPUT 1

Involves all project partners and is oriented towards the preparation of a common methodology that will be used for the preparation of guidelines focused on language for specific purposes (LSP) for different fields and languages.

INTELLECTUAL OUTPUT 2

The fields involved are: Academic English, administrative or secretarial English, mobility English and Information Technology. The project partners are involved in testing the methodology and prepared materials for the English language. The activities in IO2 will fulfil the project objective supporting the acquisition of language knowledge through the language guidance tool, and promoting the internationalization of the higher education programmes.

INTELLECTUAL OUTPUT 3

Deals with the digital technology and preparation of the mobile app. The activities in IO₃ will fulfil the project objective the usage of up-to-date IT technologies, support the acquisition of language knowledge through the language guidance tool, promote the internationalization of the higher education programmes.

INTELLECTUAL OUTPUT 4

All project partners use the developed IT technological application and methodology developed for the preparation of the language guidance tool for LSP and prepare sample materials for the project languages (other than English), e.g. Slovene, Croatian, Swedish, Romanian and Spanish for the same specific fields. The activities in IO₄ will fulfil the project objective supporting the acquisition of language knowledge through the language guidance tool, promoting the internationalization of the higher education programmes, and the usage of up-to-date IT technologies.

ACHIEVEMENTS AND RESULTS

So far, all important and vital for the project aims have been achieved:

- the methodology was prepared,
- the exercises have been prepared and checked,
- the app has been prepared and the exercises have been uploaded,
- the testing has been carried out

ACHIEVEMENTS AND RESULTS

So far, all important and vital for the project aims have been achieved:

- the methodology was prepared,

ACHIEVEMENTS AND RESULTS

Right now, the LanGuide application is in its second trial testing phase. However, if you want, you are cordially invited to participate in the app testing and evaluation.

LANGUIDE APP TESTING

You can download the application at the following link:

<http://languide.si/en/resources/files/the-languide-app/languide.apk>

Instructions for installing the application on your mobile phone can be downloaded at the following link:

<https://languide.si/en/resources/files/the-languide-app/Installation-guide-LanGuide-APK-on-Android-phone.pdf>

LANGUIDE APP EVALUATION

After using the application, please fill out the survey at the following link:

<https://forms.gle/5nRaD8YRSDbhHWCQ6>

*Thank you for your time
and your attention!*
